

PROVIDING CLEAN WATER. RESTORING HOPE. CHANGING LIVES.

GARRY HARRIS

FOUNDER & PRESIDENT

Garry Harris is a humanitarian leader, community advocate, and founder of Oasis N.O.W. Corp, a nonprofit organization committed to delivering clean water, hygiene supplies, and essential resources to underserved communities throughout the United States and around the world.

His passion for service began during his time as a student-athlete at Long Beach City College, where a life-changing experience involving a teammate's family emergency and a community blood donation effort revealed the power of collective action and compassion. That moment inspired a lifelong commitment to helping others and creating meaningful change.

After transferring to the University of Southern California in 1985, an injury brought his football career to an unexpected end. The experience redirected his focus toward a broader journey of personal growth, professional development, and community service.

In 2018, Garry partnered with Robert McRae of LIVE Alkaline Water, LLC and gained firsthand knowledge of the rare natural alkaline aquifer located in North Carolina. Through years of education and hands-on experience, he developed a deep appreciation for the vital role clean, mineral-rich water plays in supporting health and wellness.

Recognizing the potential to make a global impact, Garry helped establish strategic partnerships that expanded access to naturally alkaline spring water and humanitarian resources. In 2022, those efforts extended internationally when missionary organizations serving multiple African nations sought support for communities facing water insecurity.

Today, Garry leads Oasis N.O.W. with a vision centered on sustainability, education, and humanitarian outreach. His mission remains clear: to ensure that every person, regardless of geography or circumstance, has access to life-sustaining resources that promote dignity, health, and hope.

Under his leadership, Oasis N.O.W. continues to build partnerships, mobilize communities, and deliver solutions that create lasting impact for generations to come.

PROVIDING CLEAN WATER. | RESTORING HOPE. | CHANGING LIVES.
